

CASE STUDY

Weightron at DOC Cleaning

Weightron is a flexible tool which provides users with real-time granular, accurate and detailed waste data. Due to Weightron's ability to weigh waste on-site, it holds users accountable for their recycling and waste habits.

Enabling the collection of detailed data, Weightron can help with a wide range of issues, including monitoring recycling, monitoring financial waste information for multi-level sites and providing clear indications for developing clear auditing plans.

Weightron can be tailored to each site, creating bespoke solutions. The system can be installed in loading bays, or smaller waste sorting rooms. Assigning each bin or bag with a unique barcode sticker, it collects accurate data from multiple waste streams, across different locations.

Overview

In 2024, the Weightron system was implemented at 15 Finsbury Square House, based in the heart of the City of London, and a building we have provided our services to for over 10 years!

With various tenants in the building, of differing sizes, and with the Simpler Recycling legislation in 2025 the client wanted to be able to identify which waste, and what streams, they created as the building managing agent against the building totals.

They also wanted to obtain granular reporting data for each tenant to be able to provide feedback and great awareness of sustainable recycling practices so that the whole building benefited.

Results

Since implementing Weightron at 15 Finsbury Circus House we have been able to provide recycling percentage rates per floor into our monthly performance reviews. This has provided our client with a more detailed overview of how each tenant is performing and how to provide targeted messaging to each tenant so they can make behavioural changes for sustainable waste management.

Below is a snapshot of a performances per floor over a one-month period in November 2024.

Composition & Performance		Floor	Tenant
Floor	Composition - Net Of Weighed Material (kg)	Performance	Contamination
8		63.5%	0%
7		8.3%	0%
6		100%	0%
5		71.1%	0%

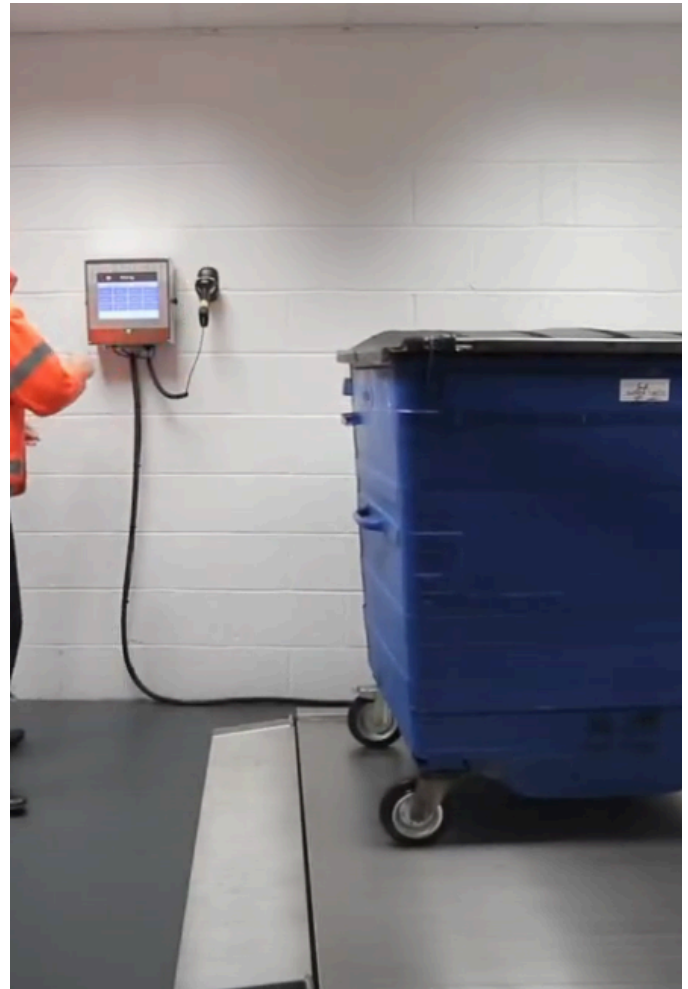

Since its implementation, one of the highest performing tenants has now become accredited to ISO 14001, which they believe was helped by having granular waste data available to report.

Incorporate Weightron Into Your Company

With the assistance of DOC Cleaning, Weightron is now available for our clients to use in their buildings. With these systems your company will be able to track recycling rates in real-time and improve recycling efforts.

Benefits of using Weightron:

- True-to-life waste data and invoicing.
- Monitor individual tenants waste at a granular level.
- Targeted audits.
- In-depth identification of waste contamination hotspots.
- Re-direct your housekeeping hours for efficiency.

Our Business

Founded in 1972, DOC Cleaning Limited provides cleaning and associated support services to over 500 locations throughout the UK. An independent, family-run organisation, we pride ourselves on being honest, friendly and approachable, whilst adopting a professional and innovative attitude to all of our activities.

If you would like to discuss Innovative Cleaning or any other DOC services, please get in touch via the email or telephone number below.
